SUMMARY

Backend-focused Software Engineer building API-driven systems and AI-integrated services with **Python/FastAPI** and **Node.js/Express**, backed by hands-on experience across PostgreSQL/MySQL databases, async task queues, and third-party API integrations. Comfortable owning a feature from schema design through deployment, with working exposure to React/Tailwind on the frontend when needed. Computer Science graduate, immediately available for full-time software engineering roles.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, C/C++, SQL, HTML/CSS

Backend: FastAPI, Node.js, Express.js, REST APIs, SQLAlchemy, JWT / Auth, RBAC

Frontend & AI/GenAI: React.js, Tailwind CSS, Bootstrap; LLM API integration (Groq / LLaMA 3.1), prompt design, AI-assisted app features

Databases & Tools/Cloud: PostgreSQL, MySQL, MongoDB; Git, GitHub, Docker, Postman, AWS, Google Cloud Platform

EXPERIENCE

Accelerator X

Bangalore, Karnataka

Tech Operations Associate Intern

January 2026 – May 2026

- Built internal **automation scripts and integrations** that streamlined recurring operational workflows and reduced manual, repetitive work across teams.
- Developed feature enhancements and integrations on internal CRM and LMS platforms, improving data organization, workflow tracking, and usability.
- Maintained company master-data systems and operational reporting, improving data accuracy and consistency across teams.

Astute Systems Technology Pvt. Ltd.

Indore, Madhya Pradesh

SDE Intern

May 2024 – July 2024

- Built and debugged **React.js** frontend components, resolving UI and functional issues across the application.
- Performed QA testing and validated REST APIs with Postman, catching bugs before release.

PROJECTS

Email Automation Platform | Async Campaign Backend | [GitHub](#)

April 2026

- Built an **email-campaign automation backend** with FastAPI and PostgreSQL, exposing REST endpoints to manage campaigns, contact datasets, senders, and templates.
- Implemented asynchronous, queued email delivery with **Celery workers and Redis**, decoupling send jobs from the API for reliable background processing.
- Structured the service into clean layers (models, schemas, endpoints, workers), managed schema changes with Alembic migrations, and containerized it with Docker Compose.
- Stack:** FastAPI, Python, PostgreSQL, SQLAlchemy, Alembic, Celery, Redis, JWT, Jinja2, Docker.

Zoom Scheduler CRM | AI Scheduling Assistant | [GitHub](#)

January 2026 – April 2026

- Built an **AI scheduling assistant** that turns natural-language requests into Zoom sessions, using a Google Gemini agent with **ChromaDB retrieval (RAG)** on a FastAPI backend.
- Implemented an async, event-driven backend integrating the Zoom, Google Calendar (OAuth PKCE), and Google Sheets APIs, with timezone-aware conflict detection and retry logic.
- Designed a React + Tailwind frontend with a role-based week-view calendar for real-time schedule visualization and overlap management.
- Stack:** FastAPI, Python, Google Gemini, ChromaDB (RAG), Zoom / Google Calendar / Google Sheets APIs, SQLAlchemy (async), React, Tailwind, Pydantic, Pytest.

EDUCATION

Vellore Institute of Technology

Vellore, Tamil Nadu

B.Tech, Computer Science Engineering [CGPA 7.50]

September 2021 – September 2025

CERTIFICATIONS

Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate | [view certificate](#)

August 2025

ACHIEVEMENTS & LEADERSHIP

- TCS CodeVita Regional Finalist:** Advanced as Regional Finalist through competitive coding rounds in TCS CodeVita.
- State Coordinator & Event Organizer – Riviera Fest:** Coordinated VIT's international fest *Riviera*, leading planning and execution of the cultural event *Aikya*.
- 1st Position in Inter-School Chess Championship:** Won 1st place in inter-school chess tournament, demonstrating strategic problem-solving.
